Position – Intermediate System Administrator

Established in 1992, FuseIT is a B2B technology solutions company with a global presence, serving enterprise clients worldwide. FuseIT are a leader of niche integration spaces, specialising in sales acceleration solutions that transform anonymous website visitors into valuable customers.

Our solutions personalise web and digital content and provide precise intelligence to sales and marketing teams to generate superior customer journeys and revenue opportunities.

We are at the forefront of Enterprise integration software. With a commitment to excellence and pushing the boundaries, we have consistently delivered ground breaking solutions that redefine standards, fuelling our client's business growth with business intelligence and data governance compliance.

Location	Nelson, Nelson / Tasman
Job type	Full time
Duration	Permanent
Approximate pay	$30 - $40 per hour

About the Role

Responsibilities to include:

- Maintain essential IT infrastructure, including operating systems, security tools, applications, servers, laptops, desktops, O365 and other 3rd party software
- Take responsibility for projects and solutions
- Handle business-critical IT tasks and systems
- Enable faster and smarter business processes
- Perform server administration tasks (ex: user/group, security permissions, windows updates, backups); research event-log warnings and errors
- Monitor data-center health using existing management tools, and respond to hardware issues as they arise
- Maintain internal infrastructure requirements, including switches, firewalls, printers, security updates; support internet, intranet, LANs, WANs
- Assist with troubleshooting to identify root cause, and provide technical support when needed
- Perform routine and scheduled audits of all systems

Qualifications and skills needed:

- Proven success in an IT role
- Support for Windows operating systems, current equipment and technologies, backup and recovery procedures, systems performance-monitoring tools, Active Directory, virtualization, IIS hosting, SQL, Visual Studio and related Dev environment.

Desirable:

- Some knowledge of a programming language or development is a plus as we are a software development company
- Any expertise in DevOps is a desirable skill for the ideal candidate

Benefits:

- Work in Nelson and enjoy the region (biking, boating, beaches, etc.)
- An opportunity to learn new skills in a relaxed environment
- Exposure to a range of duties
- Work in a small team where everyone's opinion is valued
- A healthy work-life balance with flexible working hours
- Employment benefits include medical insurance and car park
